

DSQ Demo Guide v2 - Support IQ (dSQ)

Version: 2.0.0 (Live Use Cases Edition) **Last Updated:** March 25, 2026 **Production URL:** <https://dsq.digitalworkplace.ai/dsq> **Test Status:** 116/116 Tests Passing (100%)

Overview

Support IQ (dSQ) is an AI-enhanced customer support platform supporting **3 modes** and **10 personas**. This guide groups similar queries together for easier reference.

Modes Summary

Mode	Personas	Test Coverage
Government	COR, Program Manager, Stakeholder Lead	34/34 (100%)
Project	Project Manager, Service Team Lead, Service Team Member	31/31 (100%)
ATC	Executive, CS Manager, Support Agent, CSM	51/51 (100%)

Government Mode

1. COR - Contracting Officer's Representative

Persona: Alexa Johnson | **Badge:** COR (Purple) | **URL:** /dsq/demo/cor

#	Queries (Grouped)	Widget	Response
1	"Show contract status" / "Show me current contract status" / "Show contract performance dashboard"	contract-performance-dashboard	Contract performance dashboard shows portfolio metrics and status
2	"Show vendor performance" / "Show me vendor performance metrics" / "Show me compliance dashboard"	vendor-compliance-dashboard	Vendor compliance dashboard shows SLA performance and compliance status
3	"Show deliverables due this month" / "Show me contract deliverables status"	deliverable-review-list	Deliverable reviews pending your approval
4	"Show me budget tracking dashboard" / "Budget remaining for contracts"	budget-utilization-dashboard	Budget utilization and burn rate analysis
5	"Who is top performing agent?"	agent-performance-comparison	Performance comparison for your team
6	"Who is most slacking agent?"	team-workload-dashboard	Team workload analysis showing agents who may need support

2. Program Manager

Persona: Jennifer Chen | **Badge:** PM (Blue) | **URL:** /dsq/demo/program-manager

#	Queries (Grouped)	Widget	Response
1	"Show program overview" / "Show program health dashboard" / "Program health"	program-health-dashboard	Program health dashboard shows portfolio status and key metrics
2	"Show milestone status" / "Milestone status"	milestone-tracking-dashboard	Milestone progress tracking toward key phases
3	"Show risk register"	risk-register-dashboard	Risk register shows active risks and mitigation plans
4	"Critical risk"	risk-register-dashboard	Risk register with critical items requiring attention
5	"Show resource allocation" / "Resource capacity"	resource-capacity-dashboard	Resource capacity and utilization across the team
6	"Show me sprint burndown" / "Sprint burn-down"	sprint-burndown-chart	Sprint burndown chart shows current sprint progress
7	"top performers"	agent-performance-comparison	Performance comparison for your team

3. Stakeholder Lead

Persona: Jessica Martinez | **Badge:** LEAD (Green) | **URL:** /dsq/demo/stakeholder-lead

#	Queries (Grouped)	Widget	Response
1	"Show impact analysis" / "Stakeholder engagement status" / "Show stakeholder engagement"	stakeholder-engagement-dashboard	Stakeholder engagement metrics and communication effectiveness
2	"Show change requests" / "Change request pending"	change-request-dashboard	Change requests and risk items requiring attention
3	"Show user feedback"	nps-sentiment-analysis	User feedback analysis and satisfaction trends
4	"Show requirements tracking" / "Requirements tracking status" / "Requirements traceability"	requirements-tracking-dashboard	Requirements tracking shows implementation progress
5	"Upcoming meetings"	meeting-scheduler	Meeting scheduler and upcoming appointments

Project Mode

4. Project Manager

Persona: Dale Thompson | Badge: PM (Blue) | URL: /dsq/demo/project-manager

#	Queries (Grouped)	Widget	Response
1	"Show sprint burndown" / "Burndown"	sprint-burndown-chart	Sprint burndown chart shows current sprint progress
2	"Show team velocity" / "Velocity"	team-velocity-dashboard	Team velocity trends across recent sprints
3	"Show resource capacity" / "Resource capacity"	resource-capacity-dashboard	Resource capacity and utilization across the team
4	"Show blockers" / "Blocker"	blocker-resolution-dashboard	Active blockers requiring attention
5	"Sprint planning"	task-kanban-board	Sprint task board shows current work items
6	"top performers"	agent-performance-comparison	Performance comparison for your team

5. Service Team Lead

Persona: Herbert Roberts | Badge: LEAD (Green) | URL: /dsq/demo/service-team-lead

#	Queries (Grouped)	Widget	Response
1	"Show team workload" / "Team workload"	team-workload-dashboard	Team workload dashboard shows task distribution
2	"Show code quality metrics" / "Code quality" / "technical debt"	code-quality-dashboard	Code quality metrics show technical debt and test coverage
3	"Show code reviews"	code-review-dashboard	Code review status and pending reviews
4	"Show deployment status" / "Deployment"	deployment-pipeline-dashboard	Deployment pipeline shows CI/CD health
5	"DORA metrics" / "DORA" / "Show DORA metrics"	dora-metrics-dashboard	DORA metrics show engineering performance indicators

6. Service Team Member

Persona: Molly Rivera | Badge: MEMBER (Gray) | URL: /dsq/demo/service-team-member

#	Queries (Grouped)	Widget	Response
1	"Show my assigned requests" / "Daily update"	agent-dashboard	Your daily overview with tasks and priorities

2	"my dashboard" / "Show my performance this week" / "my performance"	agent-performance-stats	Your personal performance metrics
3	"Show my sprint tasks" / "My tasks" / "Sprint task"	task-kanban-board	Sprint task board shows current work items
4	"code quality"	code-quality-dashboard	Code quality metrics show technical debt
5	"top performers"	agent-performance-comparison	Performance comparison for your team

ATC Mode (Enterprise Support)

7. C-Level Executive

Persona: Jennifer Anderson | **Badge:** EXEC (Gold) | **URL:** /dsq/demo/atc-executive

#	Queries (Grouped)	Widget	Response
1	"Show me executive summary" / "Show board-level metrics"	executive-summary	Executive summary shows key business metrics
2	"Show detailed analytics" / "Show me the detailed analytics"	analytics-dashboard	Analytics dashboard shows operational trends
3	"Show me SLA performance" / "Show me the SLA performance breakdown"	sla-performance-chart	SLA performance breakdown by tier
4	"Which customers are at churn risk?" / "Show me high-risk customers"	customer-risk-list	High-risk customers requiring attention
5	"customer sentiment"	nps-sentiment-analysis	Customer sentiment analysis and trending topics
6	"top performers"	agent-performance-comparison	Performance comparison for your team

8. CS Manager

Persona: David Miller | **Badge:** MGR (Orange) | **URL:** /dsq/demo/atc-manager

#	Queries (Grouped)	Widget	Response
1	"Show me team status" / "Show me my team's status" / "Show workload balance"	team-workload-dashboard	Team workload dashboard shows task distribution
2	"Who is top performing agent?" / "Who are the top and bottom performers?" / "compare agent performance"	agent-performance-comparison	Performance comparison for your team

3	"Who is most slacking agent?"	team-workload-dashboard	Team workload analysis showing agents who may need support
4	"Show me all high-risk customers"	customer-risk-list	High-risk customers requiring attention
5	"Show team budget"	budget-utilization-dashboard	Team budget overview and allocation
6	"my current tickets"	ticket-list	Latest end user requests
7	"Show ticket DESK-1001"	ticket-detail	Ticket details

9. Support Agent

Persona: Christopher Hayes | **Badge:** SUPPORT AGENT (Teal) | **URL:** /dsq/demo/atc-support

#	Queries (Grouped)	Widget	Response
1	"Good morning, what's on my plate today?" / "what is on my plate today" / "good morning"	agent-dashboard	Your daily overview with tasks and priorities
2	"Show me my performance stats"	agent-performance-stats	Your personal performance metrics
3	"Show me my tickets" / "my tickets"	ticket-list	Latest end user requests
4	"Show ticket DESK-1001" / "Show me ticket TICK-001"	ticket-detail	Ticket details with conversation history, AI draft, and action buttons
5	"Find similar tickets I've resolved" / "similar tickets"	similar-tickets-analysis	Similar tickets and resolution patterns
6	"Help me prepare for the call with Acme Corp" / "prepare for call"	call-prep-notes	Call preparation notes for upcoming customer call
7	"Draft response for angry customer" / "draft response"	response-composer	Draft a professional response
8	"Search knowledge base for password reset" / "password reset"	knowledge-article	Password reset guide
9	"knowledge base"	knowledge-base-search	Knowledge base search results

Live Use Cases (Support Agent Workflows)

These are end-to-end live workflows demonstrated using the **Support Agent** persona. Each use case starts with a real customer email sent to the Zoho Desk support inbox, creating a live ticket that the agent interacts

with through the dashboard.

Support Email: demohelp@auzmorsupport.zohodesk.com **Persona URL:**
<https://dsq.digitalworkplace.ai/dsq/demo/atc-support>

Use Case 1: Account Password Reset

Scenario: User is unable to login to their Auzmor Learn account.

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1005)
	<i>Example:</i> "Good Morning, I have forgotten the password of my Learn account and unable to reset my password. Can you help out? Username: naveen.k"	
2	Ask the dashboard: "Show me Ticket-1005"	ticket-detail widget displays ticket details, full conversation history, and an AI-generated draft response
3	Review the AI Draft	The draft contains step-by-step password reset instructions tailored to the customer's issue
4	Click Regenerate and enter instructions	Enter: <i>"Make the draft more professional"</i> — AI regenerates the draft with updated tone
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer via Zoho Desk

Use Case 2: Printer Not Responding

Scenario: User's printer is not responding to print jobs.

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1006)
	<i>Example:</i> "Hi, I'm reaching out to report an issue with my printer (HP_M404dn_Office) — it's currently not responding when I try to print. I've already checked the connections and restarted both the printer and my computer, but the issue persists. Could you please look into this or guide me through the next troubleshooting steps?"	
2	Ask the dashboard: "Show me Ticket-1006"	ticket-detail widget displays ticket details,

		conversation history, and AI-generated draft
3	Review the AI Draft	The AI recognizes this as a hardware/technical issue and indicates in the draft that the issue will be escalated to the Technical team
4	Click Regenerate and enter instructions	Enter: " <i>Make the draft simpler</i> " — AI regenerates with simplified language
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer
6	Click Escalate button	Opens a modal with a Jira ticket preview pre-filled with ticket details
7	Click Create Ticket	Creates a Jira ticket (e.g., KAN-135) with full context and links it to the Zoho ticket

Use Case 3: General Query - Auzmor Learn (SCORM Import)

Scenario: User is unable to import a SCORM course on Auzmor Learn.

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1007)
	<i>Example:</i> "Hi, I'm facing some difficulty in importing a course on Learn. Can you provide some assistance here? Thanks"	
2	Ask the dashboard: " Show me Ticket-1007 "	ticket-detail widget displays ticket details, conversation history, and AI-generated draft
3	Review the AI Draft	The draft contains detailed instructions on how to import a SCORM course on Auzmor Learn
4	Click Send Response	Sends the AI-generated draft as an email reply to the customer

Use Case 4: Unable to Access Features (User Access Management)

Scenario: User is unable to find the Survey's feature on Learn

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1008)
	<i>Example: "I am unable to access the Surveys feature on Auzmor Learn account https://sprint.learn-staging.auzmor.com/. The option is not visible on the Settings page. Please advise."</i>	
2	Ask the dashboard: "Show me Ticket-1008"	ticket-detail widget displays ticket details, full conversation history, and an AI-generated draft response
3	Review the AI Draft	The draft contains step-by-step triaging performed by the Agent, RCA and suggested course of action
4	Click Regenerate and enter instructions	Enter: <i>"Make the draft more professional"</i> — AI regenerates the draft with updated tone
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer via Zoho Desk

Use Case 5: Cancellation / Refund Request (Subscription & Payment)

Scenario: User wants to cancel their Auzmor Learn subscription

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1009)
	<i>Example: "I would like to cancel my subscription of Auzmor Learn at the end of this month as we have the number of users are declining. Please let me know the next steps regarding this."</i>	
2	Ask the dashboard: "Show me Ticket-1009"	ticket-detail widget displays ticket details, full conversation history, and an AI-generated draft response
3	Review the AI Draft	The draft contains step-by-step verification on subscription status and refund eligibility for the customer

4	Click Regenerate and enter instructions	Enter: <i>"Make the draft more professional"</i> — AI regenerates the draft with updated tone
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer via Zoho Desk

Use Case 6: API Key / Webhook Issue

Scenario: User wants to cancel their Auzmor Learn subscription

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1010)
	<i>Example:</i> "I have configured a webhook named 'training notifications' in my Learn account https://sprint.learn-staging.auzmor.com/ but the events are not being received in our client app. Please advise."	
2	Ask the dashboard: "Show me Ticket-1010"	ticket-detail widget displays ticket details, full conversation history, and an AI-generated draft response
3	Review the AI Draft	The draft contains step-by-step triaging performed by the Agent, RCA and suggested course of action
4	Click Regenerate and enter instructions	Enter: <i>"Make the draft more professional"</i> — AI regenerates the draft with updated tone
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer via Zoho Desk

Use Case 7: Performance & Stability

Scenario: Application is slow to respond

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1011)

	<i>Example:</i> "Auzmor Learn seems to be very slow today to respond. Pages are taking a long time to load and this is impacting productivity. Please provide a resolution."	
2	Ask the dashboard: "Show me Ticket-1011"	ticket-detail widget displays ticket details, full conversation history, and an AI-generated draft response
3	Review the AI Draft	The draft contains step-by-step triaging performed by the Agent, RCA and suggested course of action
4	Click Regenerate and enter instructions	Enter: <i>"Make the draft more professional"</i> — AI regenerates the draft with updated tone
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer via Zoho Desk

Use Case 8: Device / Environment

Scenario: Browser compatibility Issue

Step	Action	What Happens
1	Send email to demohelp@auzmorsupport.zohodesk.com	Zoho Desk creates a new ticket (e.g., #1012)
	<i>Example:</i> "The SCORM courses from Auzmor Learn are not rendering correctly in Brave browser which is my default browser. Please help with this issue."	
2	Ask the dashboard: "Show me Ticket-1012"	ticket-detail widget displays ticket details, full conversation history, and an AI-generated draft response
3	Review the AI Draft	The draft contains step-by-step triaging performed by the Agent, RCA and suggested course of action
4	Click Regenerate and enter instructions	Enter: <i>"Make the draft more professional"</i> — AI regenerates the draft with updated tone
5	Click Send Response	Sends the AI-generated draft as an email reply to the customer via Zoho Desk

Live Use Case Features Summary

Feature	Widget/Component	Description
Ticket Detail View	LiveTicketDetailWidget	Shows ticket info, SLA tracking, contact details, full conversation timeline
AI Draft Generation	DraftEditorPanel	Claude 3.5 Sonnet generates context-aware response drafts
Regenerate Draft	Regenerate button + instruction input	Modify draft tone/content with natural language instructions
Send Response	Send Response button	Sends formatted HTML email reply via Zoho Desk API
Escalate to Jira	EscalateTicketModal	Creates Jira ticket with rich text editor and ADF formatting

10. Customer Success Manager (CSM)

Persona: Jordan Taylor | Badge: CSM (Purple) | URL: /dsq/demo/atc-csm

#	Queries (Grouped)	Widget	Response
1	"Show customer health scores" / "customer health scores"	customer-risk-list	Customer health scores and account status
2	"Show upcoming renewals" / "upcoming renewals"	renewal-pipeline	Upcoming contract renewals
3	"Show upsell opportunities" / "upsell opportunities" / "expansion opportunities"	upsell-opportunities	Expansion and upsell opportunities
4	"Which customers declining adoption?" / "product adoption"	product-adoption-metrics	Product adoption metrics and feature usage
5	"churn risk analysis"	customer-risk-profile	Churn risk analysis for at-risk clients
6	"NPS survey results"	nps-sentiment-analysis	NPS and customer feedback analysis
7	"business review"	meeting-scheduler	Business review scheduling
8	"top performers"	agent-performance-comparison	Performance comparison for your team

Universal Queries

These queries work across ALL personas:

#	Queries (Grouped)	Widget	Response
1	"Show me zoho tickets" / "show me my zoho tickets" / "Show me tickets"	ticket-list	Latest end user requests
2	"top performers" / "Who is top performing agent?"	agent-performance-comparison	Performance comparison for your team
3	"draft a response"	response-composer	Draft a professional response

Quick Stats

Metric	Value
Total Unique Widgets	28
Total Query Patterns	116
Grouped Query Sets	52
Personas	10
Modes	3
Live Use Cases	8 (Password Reset, Printer Issue, SCORM Import, User Access, Cancellation/Refund, API/Webhook, Performance, Browser Compatibility)
Live Workflow Steps	40 (across all 8 use cases)
Knowledge Base Items (DSQ)	33 (with 100% embedding coverage)
Global Embeddings	474/474 (100%)
